

CONTENTS

RISK GOVERNANCE AND POLICY (RGP)

The Natural Hazards Forum in Norway – cooperation across sectors	16
Hallvard Berg	
EconoMe-iCost – a tool towards estimating the effect of indirect consequences on the benefit-cost-ratio of mitigation measures	19
Michael Bründl, Linda Zaugg-Ettlin, Reto Baumann, Maren Berwert , André Burkard, Fabian Dolf, Eva Gertsch-Gautschi, Peter Gutwein, Wolfram Kägi, Bernhard Krummenacher, Michael Lobsiger, Nicole Bieber-Oggier, Bernhard Loup, Adrian Schertenleib	
Nature-based solutions to reduce hydro-meteorological risk in rural mountain areas	22
Vittoria Capobianco, Amy Oen, Bjørn Kalsnes, Anders Solheim, Farrokh Nadim	
Effectiveness of warning and evacuation measures for preventing sediment-related disasters	25
Miki Chiba	
Contingency planning - A national guideline	28
Alexandra Kessler, Markus Müller, Thomas Egli	
Coping and cooperation: flood-response in a federal political system – examples from Switzerland	31
Christophe Liennert, Stefan Meier, Silvio Moser	
Integrated Water Management in Austria - The River Development and Risk Management Concept.....	34
Clemens Neuhold	
New ways of risk management in Bavaria – comprehensive approaches and communication	37
Wolfgang Rieger, Ronja Wolter-Krautblatter, Katarzyna Haponiuk-Winiczenko, Christin Werthmüller	
Planned Relocation in Natural Hazard Management - The Case of Austria	40
Arthur Schindelegger	
Regional economy effects of disaster risk reduction investments	43
Frank Sinabell, Dieter Pennerstorfer	
Establishing Guidelines for Landslide and Avalanche Hazard Mapping in Norway	45
Martine Sagen Slåtten, Odd Are Jensen, Yngve Midtun, Odd-Arne Mikkelsen, Jaran Wasrud, Eli Katrina Øydvinn	
Small country, big challenges – Switzerland's hazard prevention	48
Dorothea Wabbels, Josef Eberli, Gian Reto Bezzola	

Flood protection at the Tyrolean Inn River – Communication strategies for handling diverging technical and financial interests	51
Stefan Walder, Michael Sturm, Irina Kampel	
Mainstreaming climate change adaptation and disaster risk reduction – Key findings of case studies in the Alpine macro-region.....	54
Karin Weber, Wolfgang Lexer, Catrin Promper, Kilian Heil, Florian Rudolf-Miklau, Doris Damyanovic	
Implications of different pluvial flood models for comprehensive flood risk management in Austria.....	58
Martin Wenk	
 DATA ACQUISITION AND MODELLING (DAM)	
Mitigating flood risk through sharing information online at Flomhendelser.no.....	62
Amund Frogner, Ingeborg Kleivane Krøgli, Lars Løkeland Slåke	
A model chain to identify forests with a protection function and to quantify their protective effects against natural hazards	66
Christopher James Laplante D'Amboise, Jan-Thomas Fischer, Michaela Teich, Michael Neuhauser, Karl Kleemayr	
The importance of systematic regional landslide characterization to improve landslide warning and hazard mapping	69
Graziella Devoli, Kamilla Sandboe, Håvard Mongstad, Hervé Colleuille	
3D numerical simulation of the Lituya Bay 1958 tsunami event utilizing the CFD software Flow 3D.....	73
Andrea Franco, Jasper Moernaut, Barbara Schneider-Muntau, Markus Aufleger, Michael Strasser, Bernhard Gems	
Unraveling the groundwater behavior in landslide mass during heavy rain by multi-layer ground temperature monitoring	77
Gen Furuya, Gonghui Wang, Jun Ihara, Akira Suemine, Kazuyoshi Asai	
Development of a real-time flood forecasting system for medium sized alpine catchments.....	82
Sebastian Gegenleithner, Julia Band, Clemens Dorfmann, Josef Schneider, Friedrich Wölfelmaier, Gerald Zenz	
Interaction of fluvial hazard processes and buildings at a debris cone – modelling demand, related challenges and consequences for impact assessment	85
Bernhard Gems, Michael Sturm, Florian Keller, Bruno Mazzorana, Sven Fuchs, Maria Papathoma-Köhle, Markus Aufleger	
Groundwater flow in a complex rock-slope failure area, Stampa, Western Norway	88
Helge Henriksen, Rannveig Skoglund, Berit Soldal	

Physical model tests of erosion protection on the side slope of steep rivers	91
Priska Helene Hiller, Michal Pavlíček,	
Effect of differences in the amount of tephra-fall on discharge from a hillslope in the Arimura River basin, Sakurajima, Japan: Comparison between 2012 and 2017–2018	94
Marino Hiraoka, Shin-ichiro Hayashi, Sakiko Tetsuka, Yusuke Yamazaki, Yasuo Ishii	
Uncrewed aerial systems photogrammetry to spatially monitor slope deformations	97
Anne Hormes, Christian Demmler, Marc Adams, Christine Fey, Marc Ostermann, Christina Rechberger, Filippo Vecchiotti, Louise Mary Vick, Christian J. Zangerl	
Continuous debris flow monitoring and detection using load cells in Sakura-jima Island....	101
Takahiro Itoh, Satoshi Tagata, Takahisa Mizuyama	
Application of new, area-wide hydrologic data in precipitation / runoff modelling of torrent catchments.....	104
Johannes Kammerlander, Bernhard Kohl, Christian Zangerl, Manfred Pittracher, Gebhard Walter	
Determination of flow resistance coefficients in regulated torrent channels with flow velocity measurements	107
Johannes Kammerlander, Christoph Senckenberg, Bernhard Gems, Markus Moser	
Analysing the impacts of extreme precipitation events on geomorphic systems in torrential catchments – a comparative study from Upper Styria, Austria	110
Nicole Kamp, Paul Krenn, Stefanie Peßenteiner, Michael Funder, Oliver Sass	
Usage of large-scale hydrological information for runoff estimation in ungauged catchments.....	113
Klaus Klebinder, Gerhard Markart, Bernhard Kohl	
Extended surface runoff coefficient map East Tyrol.....	115
Bernhard Kohl, Gerhard Markart, Gebhard Walter, Manfred Pittracher, Johannes Kammerlander	
Effects of forest cover on water balance in protective forests	117
Veronika Lechner, Daniela Klingsbigl, Gerhard Markart, Gertraud Meißl, Frank Perzl, Giacomo Bertoldi, Christian Scheidl	
Long-term sediment runoff by bedload and washload measurements	120
Satoru Matsuda, Jun-ichi Akanuma, Mitsuo Fukuda, Ken Goto, Tsukanori Kashita, Satoshi Tagata, Shiho Kimura, Kazuhide Igarashi, Takahiro Itoh9	
Suspended sediment runoff and sources from mountain to sea during flood events associated with four typhoons in northern Japan	123
Shigeru Mizugaki, Junichi Otsuka, Yasuhiro Murakami, Hiromi Akita, Atsushi Tanise, Masa-aki Murayama	
Estimation of suspended sediment budgets in alpine rivers.....	126
Rudi Nadalet, Roberto Dinale, Luca Maraldo, Martin Pernter, Arnold Richter, Francesco Comiti	

Landslide Propagation Modelling for Hazard Assessment	129
Herwig Proske, Christian Bauer, Nicole Kamp, Andrea Danklmaier, Christoph König	
Comparing different approaches for debris flow velocity estimation at the Lattenbach and Gadria catchment	132
Andreas Schimmel, Johannes Hübl, Velio Coviello	
Monitoring and forecasting the Veslemannen rock slide	135
Ingrid Skrede, Lars Harald Blikra, Lene Kristensen, Einar Anda, Gustav Pless, Gudrun Dreiås Majala, Andreas Grøvan Aspaas	
Examples on Practical Use of Drone Technology in Flood- and Avalanche Hazard Management.....	138
Simon Sørli, Kjetil Indrevær, Grete Aalstad, Paul Christen Røhr, Tore Leirvik, Toril Hofshagen	
Back-calculation of the Mjåland debris flow in 2016 and importance of post-event field surveys	141
Hervé Vicari, Steinar Nordal, Vikas Thakur	
Life cycle assessment (LCA) modelling of alpine natural hazards protection structures	144
Magdalena von der Thannen, Roman Paratscha, Thomas Lampalzer, Hansjörg Hufnagl, Hans Peter Rauch	
Data accumulation of sediment transport and hydrology in mountainous rivers.....	147
Takao Yamakoshi, Hiroaki Izumiya, Taro Uchida	
Integrated simulation on multiple shallow landslide and debris-flow employing contour-based terrain modelling in watershed-scale	150
Kazuki Yamanoi, Daizo Tsutsumi, Rinto Koshi, Masaharu Fujita	
 HAZARD AND RISK ASSESSMENT (HRA)	
The new Swiss joint information platform for natural hazards (GIN)	154
Markus Aeschlimann, Philipp Angehrn	
Indicators and expert evaluation in the identification of flood hazard management priorities.....	157
Gabriele Bertoldi, Tamara Michelini, Sebastiano Piccolroaz, Ruggero Valentinotti	
A web-based tool for exploring the effects of key flood risk drivers on the overall future flood damage evolution in Switzerland	160
Mattia Brughelli, Anna Fehlmann, Mirjam Mertin, Luzius Thomi, Rouven Sturny, Markus Mosimann, Olivia Romppainen-Martius, Andreas Zischg, Margreth Keiler	
WoWW - World of Wild Waters - creating immersive understanding of cause and consequence.....	163
Oddbjørn Bruland, Andrew Perkis, Christian A. Klöckner, Sara Martino, Vikas Thakur, Silius Mortensønn Vandeskog, Adina Moraru, Shafaq Irshad, Amanda Elizabeth Lai, Nitesh Godara, Michal Pavláček	

The online map services for unstable rock slopes and related hazard zones in Norway	166
Martina Böhme, Thierry Oppikofer, Reginald L. Hermanns, Gudrun Dreiås Majala, Bo Nordahl, Sverre Iversen, Alexandra Jarna	
Thermokarsts on an ice-rich rock glacier in Tignes, French Alps	169
Bastien Charonnat, Marco Marcer, Pierre-Allain Duvillard, Philippe Schoeneich, André Revil, Giovanni Balestri	
A regional-scale risk assessment framework for flood, debris flood and debris flow geohazards in British Columbia, Canada	172
Beatrice Collier-Pandya, Kris Holm, Carie-Ann Lau, Matthias Jakob, Elisa Scordo	
Destabilization of high mountain infrastructure built on permafrost in the French alps: Lessons from the past and future challenges	175
Pierre-Allain Duvillard, Ludovic Ravanel, Philippe Schoeneich	
Risk assessment of buildings exposed to rock falls and snow avalanches	178
Unni M. K. Eidsvig, Heidi Hefre, Katrine Mo, Kjetil Sverdrup-Thygeson	
Characteristics of Debris Flow and Driftwoods Transport during the July 2017 Northern Kyushu Heavy Rainfall, Japan	181
Chikako Eto, Haruka Mori, Hideaki Mizuno, Tetsuya Kubota	
Effects of forest management on avalanche hazard in Jølster/Western Norway	184
Peter Gauer, Peter Bebi, Simon Wolff, Odd Are Jensen	
Effects of a changing climate on hazard zonation for landslides and avalanches	187
Kjersti Gisnås, Heidi, Hefre, Christian Jaedicke, Frode Sandersen	
Conceptual model for quantification of snow avalanche return periods	190
Carl Bonnevie Harbitz, Alf Harbitz	
Supercritical flow over fluvial and non-fluvial sediments as underestimated hazard in terms of extraordinary floodings	193
Christoph Hauer, Peter Flödl, Ulrich Pulg	
Towards an "Industry standard" for hazards mapping in Norway: Challenges faced	196
Heidi Hefre, Peter Gauer, Odd Are Jensen, Martine Sagen Slætten	
Emergency response planning along the River Thaya - dealing with pluvial and fluvial floods	199
Raimund Heidrich, Jürgen Waser	
A simple method to estimate debris-flow hydrographs for hazard assessment.....	202
Johannes Hübl	

Method for probability assessment of slope failure on hillsides using LiDAR data.....	205
Yoshiharu Ishikawa, Rina Nagai	
NAKSIN - A new methodology for avalanche hazard indication maps in Norway.....	208
Dieter Issler, Kjersti Gleditsch Gisnås, Peter Gauer, Marte F. Busengdal, Ulrik Domaas	
Projected Climate Change Effects on Shallow Landslides, North Shore Mountains, Vancouver, Canada	211
Matthias Jakob, Trevor Owen, Kai He	
Hydro-meteorological trigger conditions of torrential flows in the Austrian Alps.....	214
Roland Kaitna, David Prenner, Markus Hrachowitz	
Mapping the risk of large rock avalanches in Greenland.....	216
Marie Keiding, Kristian Svennevig, Trine Dahl-Jensen, Michele Citterio, Anne Munck Solgaard, Sara Salehi, Tove Nielsen, Matthew Owen	
A comparative study of two rock glacier front slope failures (South Tyrol, Eastern Italian Alps)	219
Christian Kofler, Volkmar Mair, Ian Nettleton, Francesco Comiti, Maria Cristina Todisco, Stefan Steger, Marc Zebisch, Stefan Schneiderbauer	
EVOFOND: a simple 1D model for the simulation of erosion and deposition processes caused by torrent extreme floods.....	222
Damien Kuss, Yann Queffelean, José Vazquez, Olivier Marco, Simon Carladous, Gilles Isenmann, Rémy Martin	
Probabilistic avalanche runout analysis.....	225
Zhongqiang Liu, Dieter Issler	
Landslide risk mapping in Sweden, in a changing climate.....	228
Hjördis Löfroth, Karin Bergdahl, Karin Odén, Gunnel Göransson, Ramona Kiilsgaard, Åsa Jönsson, Godefroid Ndayikengurukiye, Mats Öberg	
Project ALBINA: A consistent and multilingual cross-border avalanche forecasting system.....	231
Rudi Mair, Norbert Lanzanasto, Alex Boninsegna, Christoph Mitterer	
Development of Environmental and Disaster Risk Information System (EDRIS).....	234
Kuniaki Miyamoto, Masaru Onodera, Takahiro Itoh	
Economic valuation of ecosystem-based rockfall risk reduction considering disturbances and comparison to structural measures	237
Christine Moos , Mélanie Thomas, Bernhard Pauli, Ger Bergkamp , Markus Stoffel, Luuk Dorren	
Run-up observations based on multiple debris-flow surges	240
Georg Nagl, Christian Scheidl, Johannes Hübl	

Enhancing rockfall hazard assessment by linking cliffs to exposed infrastructures reached by 3D simulated rockfalls	243
François Noël, Michel Jaboyedoff, Catherine Cloutier, Dominique Turmel, Jacques Locat	
Japanese approaches of early-warning for sediment disasters using rainfall indices with radar observation.....	246
Yasuhiro Nomura, Hiroaki Nakaya	
Rock avalanches in Norway - first complete hazard map in the county of Møre & Romsdal	249
Thierry Oppikofer, Reginald L. Hermanns, Martina Böhme, Odd André Morken	
A guideline for physical vulnerability assessment of buildings exposed to dynamic flooding.....	252
Maria Papathoma-Köhle, Mattias Schlägl, Marie Sophie Attems, Sven Fuchs	
Extreme events and aging of defence works challenge the definition of residual scenarios for debris-flow hazard assessment: the case of the Rotiano Creek (Province of Trento, Italy).....	255
Sebastiano Piccolroaz, Gabriele Bertoldi, Marco Borga, Andrea Casonato, Lorenzo Marchi, Tamara Michelini, Giorgio Rosatti, Ruggero Valentinotti	
Weather-related hazard analyzes along the Austrian railway lines considering climate change effects	258
Christian Rachoy, Tabea Fian, Georg Hauger, Christoph Matulla, Johann Peter Rauch	
Hazard assessment of pluvial flooding in urban areas under consideration of fluvial influences.....	261
Stefan Reinstaller, Gerald Krebs, Dirk Muschalla	
Rockfall Experiments in Forests: Influence of Rock-Shape and Deadwood	264
Adrian Ringenbach, Andrin Caviezel, Guang Lu, Marc Christen, Peter Bebi, Perry Bartelt	
The necessity of process scenarios in hazard maps for rivers in alpine basins	267
Stephan Schober, Gerhild Jury	
Constructing a landslide database from global coverage satellite archives	270
Michel Speiser	
EXAR – extreme floods in the Aare River (Nicolas Steeb er påmeldt)	273
Nicolas Steeb, Norina Andres, Alexandre Badoux, Patrick Baer, Peter Billeter, Vinh Dang, Christoph Hegg, Roni Hunziker, Andrea Irniger, Sebastian Jäberg, Tobias Karrer, Mario Koksch, Michael Müller, Matthias Pfäffli, Carlo Scapozza, Severin Schwab, Andreas Sutter, Daniel Viviroli, Calvin Whealton	
Classification of the tsunami potential in perialpine lakes, based on simple parameters ...	276
Michael Strupler, Paola Bacigaluppi, Katrina Kremer, Frederic Evers, Carlo Cauzzi, David Vetsch, Achim Kopf, Robert Boes, Donat Fäh, Flavio S. Anselmetti, Stefan Wiemer	

What is the potential for earthquake-triggered landslides in Norway?	279
Mathilde B. Sørensen, Torbjørn Sletten Haga	
Debris Flow Torrent Smart Patrol based on Augmented Reality and Smartphone	282
Ting-Chi Tsao, Chuan-Yi Huang, Hsiao-Yuan Yin, Keng-Ping Cheng	
Estimation of extremely rare floods in a large river basin from continuous hydrometeorological simulations	285
Daniel Vivioli, Martina Kauzlaric, Anna E. Sikorska-Senoner, Maria Staudinger, Luise Keller, Calvin Whealton, Gilles Nicolet, Guillaume Evin, Damien Raynaud, Jeremy Chardon, Anne-Catherine Favre, Benoit Hingray, Rolf Weingartner, Jan Seibert	
Influence of saline water ascending from deep reservoir into the large-scale landslide: An example of Kamazuka-Dangosashi landslide, Japan	288
Naoki Watanabe, Hisanori Sato, Gen Furuya, Hideaki Marui	
Sediment Yield Characteristics in Central Asia by Satellite Image: Kyrgyzstan Case Study of Sediment Control Using Japanese Method	291
Satoshi Yoshida, Hiroshi Ogawa, Takahiro Itoh, Kuniaki Miyamoto, Kalamamatov Aibek	
 HAZARD AND RISK MITIGATION (HRM)	
Integration of natural hazards in the Swiss Standard "Actions on Structures"	296
Norina Bertsch, Thomas Egli, Stefan Margreth	
Breathing Check Dam Management in a High-Sediment-Disaster Torrent	299
Yu-Fang Chiu, Su-Chin Chen	
Recent advances on debris flow early warning and risk management in Alto Adige / South Tyrol, Italy	302
Velio Coviello, Sandro Gius, Goetz-Florian Rufinatscha, Pierpaolo Macconi, Francesco Comiti	
Investigation and analysis of the recently discovered sabo facilities built in Tateyama Caldera 100 years ago	305
Mitsuhiko Ebata, Masahiko Ichii, Yasuhiro Nomura, Takashi Ihara, Eizo Makino, Tomoyuki Noro, Masaru Miyashita, Koji Kamee, Hisashi Watanabe	
Mitigation measure manual	308
Priska Helene Hiller	
Surveying masonry check dams in the Souzu River damaged by the July 2018 heavy rainfall	310
Ryo Hirata, Nagazumi Takezawa, Norihisa Someya, Yasuo Ishii	
Development of a digital device for monitoring and predictive maintenance of flexible steel protection systems against natural hazards	313
Helene Hofmann, Matthias Sorg, Arnulf Hörtnagl, Aron Vogel, Jonas von Wartburg	

Integrated heavy rain risk management in the European context	316
Rudolf Hornich, Cornelia Jöbstl, Sabine Scharfe, Uwe Müller, Anna Goris, Stefanie Weiner	
Proposal for Prior Learning to Support The Effective Improvement of Disaster Prevention Drill for Sediment Disaster	319
Mizuki Kawai	
A consistent definition of site and object protection forests, and their protective effects (Michaela Teich er påmeldt)	322
Karl Kleemayr, Michaela Teich, Anne Hormes, Matthias Plörer, Frank Perzl	
Monitoring dedicated to the set up of an alert system for landslide triggered debris flows: the Valloire case study (Savoie, France)	326
Dominique Laigle, Denis Jongmans, Frédéric Liebault, Laurent Baillet; Etienne Rey, Firmin Fontaine, Laurent Borgniet, Mylène Bonnefoy-Demongeot, Frédéric Ousset	
Automatic Deformation Analysis with Cloud Processing of High-Resolution Images with Examples of Veslemannen (Norway) and Trift Glacier (Switzerland).....	329
Lorenz Meier, Susanne Wahlen, Lene Kristensen	
Long-term Monitoring in Bondo: over two Years of Permanent Radar Measurements at Piz Cengalo and seven Years with Debris Flow Alarm System	332
Lorenz Meier, Susanne Wahlen, Christian Kuster, Richard Steinacher	
Dual avalanche radar system for large-scale avalanche detection with automatic road closure and reopening functionality for an avalanche-prone access road in Northern Norway.....	335
Andreas Per-Ola Persson, Lorenz Meier, Susanne Wahlen, Paul Velsand	
Åknes drainage project; a study of drainage as mitigation for the Åknes large landslide	338
Gustav Pless, Lars Harald Blikra, Lene Kristiansen, Clara Sena	
Improving both flood control and ecological status? Eco-friendly flood control methods and how to apply them in post-glacial rivers.....	341
Ulrich Pulg, Christoph Hauer, Peter Flödl, Robert Lennox, Sebastian Stranzl, Espen E. Olsen, Siss-May Edvardsen	
Mitigation measures in the Krvavec ski-resort area (N Slovenia, Europe) against debris floods and debris flows (Nejc Bezak er påmeldt)	344
Jošt Sodnik, Nejc Bezak, Jernej Jež, Mateja Jemec Aufli , Matjaž Mikoš	

Reducing the risk from climate induced hazards to buildings and infrastructure; KLIMA 2050 - A centre for research-based innovation	347
Anders Solheim, James M. Strout, Luca Piciullo, Bjørn G. Kalsnes, Unni K. Eidsvig, Vittoria Capobianco, Håkon Heyerdahl, Carl B. Harbitz, Jose M. Cepeda	
Snowcatcher - Two winters of interaction between occurring avalanches and a flexible interception structure	350
Gernot Stelzer, Engelbert Gleirscher, Daniel Illmer, Ahren Bichler	
Large-scale hydro-geological characterization of flow systems in an alpine region (Northern Tyrol, Austria)	353
Wolfgang Straka, Thomas Strauhal, Christian Zangerl, Meinhard Pittracher, Bernhard Kohl, Gerhard Markart, Thomas Sausgruber, Leopold Stepanek, Johannes Kammerlander, Manfred Pittracher	
A national university course on geohazards in Norway	356
Mathilde B. Sørensen, Louise M. Vick, José Cepeda, Felix Halpaap, and the national geohazards course consortium	
Event-based flood management: Best practice example of a cooperation between the local government and the power plant operator of a power plant chain at the Drau River, Austria	359
Erich Zdovc, Reinhold Totschnig	
Approach for maintenance management of Sabo facilities that passed many years after completion	362
Hisashi Watanabe, Koji Kamee	
Added value of soil moisture measurements for landslide early warning	365
Adrian Wicki, Christian Rickli, Manfred Stähli
