Verzeichnis der wissenschaftlichen Pflanzennamen

zu: BENZ Robert (†) 1922. Die Vegetationsverhältnisse der Lavanttaler Alpen.

Vorarbeiten zu einer pflanzengeographischen Karte Österreichs, XI.

(Abhandl. zool.-bot. Ges. Wien, 13/2)

Zusammengestellt

von

Felix W I D D E R (Graz)

(Aus dem Institut für systematische Botanik der Universität Graz)

Die inhaltsreiche Gebietsmonographie von BENZ enthält eine große Zahl interessanter Angaben, vor allem von Fundorten, die manchmal weit über das behandelte Gebiet hinausreichen. Die volle Auswertung dieser Nachweise war durch das Fehlen eines Registers bisher sehr erschwert. Diesem Übelstand soll die folgende Zusammenstellung abhelfen. Sie dürfte nicht nur den bisherigen Besitzern dieses Heftes der bekannten „Vorarbeiten zu einer pflanzengeographischen Karte Österreichs“ willkommen sein, sondern wird auch im Sinne der modernen Dokumentation dazu beitragen, die bisher kaum auffindbaren, aber vielfach auf eigenen Erfahrungen beruhenden, neuen und deshalb besonders wichtigen Angaben von BENZ als leicht zugängliche Quellen im Schrifttum ausgiebiger berücksichtigen zu können. Denn für zahlreiche Arbeitsgebiete, namentlich für pflanzensoziologische, florensgeschichtliche und sippensystematische Untersuchungen ist eine der wichtigsten Grundlagen die genaue und leicht benutzbare Erfassung des Sippenbestandes eines Gebietes.

Dem Herausgeber der „Angewandten Pflanzensoziologie“, Herrn Honorarprofessor Dr. Erwin AICHINGER, gebührt daher aufrichtiger Dank für das verständnisvolle Entgegenkommen, mit dem er dieses Verzeichnis, das der Originalarbeit auch im Satzspiegel angeglichen ist, in seine Schriftenreihe als besonderes, auch einzeln beziehbares Heft eingereiht hat. Ebenso sei auch der Stadtgemeinde Wolfsberg sowie den Gemeinden Frantschach-St. Gertraud und St. Stefan i. Lav. für Druckkostenzuschüsse gedankt.

Aufgenommen wurden alle wissenschaftlichen Pflanzennamen in der von BENZ gewählten Schreibweise unter Verzicht auf nomenklatorische Änderungen und unter Weglassung der Autorennamen. Geringfügige Versehen, offensichtliche Druckfehler, wurden selbstverständlich verbessert; so wurde z. B. gedruckt: *Bidens cernuus* (statt „cernua“) — *Buphthalmum salicifolium* (statt „salicifolia“) — *Glyceria* (statt „Glyzeria“) — *Leontodon autumnalis* (statt „autumnale“) — *Melandryum silvestre* (statt „silvestris“) — *Moehringia muscosa* (statt „mucosa“) — *Phyteuma betonicifolium* (statt „betonicifolia“) — *Pinguicula* (statt „Pinguicola“) — *Salix grandifolia* (statt „grandiflora“) — *Sanguisorba officinalis* (statt „officinale“).

Auf einige andere wahrscheinliche Druckfehler oder Irrtümer wurde zwischen Klammern (..... W.) hingewiesen.

Wenn ein Name auf einer Seite mehrmals vorkommt, so wurde die betreffende Seite im Verzeichnis nur einmal angeführt.

- Abies alba* 31, 33, 36, 66.
Acer campestre 34, 38, 39, 66.
 — *platanoides* 38.
 — *pseudoplatanus* 31, 33, 35
 38, 58, 66.
Achillea clav(en)ae (intercedens) 99,
 114, 138.
 — *millefolium* 41, 45, 57, 76.
 — — *var. roseum* 95.
